**ABSTRACT:**

PURPOSE: A more efficacious remedy for insect bite, obtained by blending HAKURAKUKAI (dried leaves and steams of Macleya cordata R.Brown) with KORONBO (dried roots of Jateorhiza columba Miers) and plant ash and, as necessary licorice and phellodendron bark with hardly any side effect.

CONSTITUTION: A remedy for insect bite obtained by blending (A) 0.3~20% HAKURAKUKAI which is a dried leaf and stem of Macleya cordata R.Brown of the genus Macleya of the family Papaveraceae with (B) 0.05~20% KORONBO which is a dried tuberous root of Jateorhiza columba Miers of the family Menispermaceae and used as a bitter stomachic agent, (C) 0.005~5% plant ash, preferably alkaline ash and, as necessary, (D) 0.05~20% licorice used as an analgesic, antispasmodic and antitussive and expectorant, (E) 0.05~20% phellodendron bark used as a bitter stomachic agent and fomentation. The remedy is particularly efficacious against insect bite in which the insect venom consists of proteins, formic acid, etc.
